

# Indoor Cabling Components

## Indoor connectors for flexible ducts

### APPLICATION:

The branch-off connectors for indoor are designed to branch off microduct(s) at any location in the indoor network. The straight connectors are designed to connect the flexible protective ducts for extension.

### FEATURES:

- Easy installation
- Branch-off any place any time
- No two component resin
- No cable splice at branch-off
- Robust, high crush resistance
- Small size
- No interference with live traffic in the other microducts

### CONSTRUCTION:

All branch-off connectors are fully dividable.  
The material is flame retardant low smoke, zero halogen.

### Components Branch-off connectors

Duct in	Duct out	Branch type	Packing	Ordering code
N17	N17 / N12	Angle 30°	Box 20 pieces	<b>1013657</b>
N23	N23 / N17	Angle 30°	Box 10 pieces	<b>1013658</b>
N29	N29 / N17	Angle 30°	Box 10 pieces	<b>1013659</b>
N23	N23 / N23	Split	Box 10 pieces	<b>1013660</b>
N29	N23 / N23	Split	Box 10 pieces	<b>1013661</b>

For adaption of standard branch-off connector configurations to other main and branch duct sizes

### Components Port reducers

Port reducer type	Packing	Ordering code
N17 – N12	Box 10 pieces	<b>1013662</b>
N23 – N12	Box 10 pieces	<b>1013663</b>
N23 – N17	Box 10 pieces	<b>1013664</b>

### Components Straight connectors

Straight connector type	Packing	Ordering code
N17 – N17	Box 10 pieces	<b>1013654</b>
N23 – N23	Box 10 pieces	<b>1013655</b>
N29 – N29	Box 10 pieces	<b>1013656</b>
