

# Duct system outside plant

## Twin wall cable protection flexduct

### APPLICATION:

The twin wall protective flexible duct is used in OSP networks to provide mechanical protection for installed cable. The duct is laid in a trench without extra protection.

### FEATURES:

- Flexible duct, easy to install
- High crush resistant, ring stiffness SN 8
- Smooth inner wall for easy cable installation
- Ribbed outer wall provides flexibility and strength
- Pre-installed polyamid pull cord

### MATERIAL:

Thermo Plastic Copolyester
