

## Sirocco Tubes (External) - Direct Bury Assembly

Prysmian Part Number: See Table Below

Profile of a 7 way assembly

### Empty small diameter HDPE low friction tubes for blown fibre installation in last-mile and campus applications.

- Rapid dedicated customer connect using proven mechanical protection of HDPE.
- Low friction internal coating for maximum fibre blowing distance.
- 5 mm O/D, each tube accommodates up to a 12 fibre unit.
- Recommended for direct burial, heavier construction lies flatter in trenches and has more resistance to localised bending.
- Aluminium layer acts as moisture barrier.
- Can be customised to suit user requirements (e.g. tube style, sheath colour, print legend).
- Supplied on wooden drums containing either one length of tube or multiple lengths for simultaneous installation.
- External versions available in different constructions – direct install, direct bury, steel armour, anti-termite, anti-rodent.

### Assembly of tubes surrounded by an aluminium moisture barrier and two polyethylene sheath layers for improved crush, tensile and bending performance.
